La Piata is putting on some of its former airs again. The district to the southeast of Logan which caused a flurry of excitement in the summer of 1881 is becoming quite active, and there is every indication that it will become one of the prosperous camps of Urah. It first attracted attention because of its bodies of silver and lead, but latest developments three have disclosed a fine showing of copper ore in the La Plata Sandowa mine. The ore is a gray copper, and a brenst fully five feet wide has been uncovered in a tunnel at the distance of fity fest. When the cre was first discovered a short time ago it was a mere seam in the rock, but in the course of development it has wished out to the proportions above stated.

A. E. Hyde, who is interested in the property, paid a visit to it last week and came home Saturday evening, which, from all appearances, is pretty good steff.

While he was there a force of men was put to work getting the foundations ready and the building under way. The new shaft is being put down very rapidly. It is now at a depth of 100 feet, and seventy-five feet more will be required before the vely is encountered. Mr. Andrew says the camp hever was so lively before. Prospecting work is going on everywhere, and a great many

Charles Lammers-dorf and John Dern, the latter the prospective purchaser, held a confer-ence yesterday, but were unable to arrive at any agreement on terms by which Mr. Lammersdorf is willing to unload some of his holdings. It ap-pears Mr. Lammersdorf wants a pret-ty stiff price for the stock, more than Mr. Dern is willing to give, notwith-standing the favorable impression he has formed of the possibilities of the mine.

Another meeting may be held tomor-row, at any rate, another conference will probably be held before the deal will be declared off entirely.

Not Much Activity There at Present.

(Special Correspondence.) Bingham, July 2.—Your correspondent neandered up Markham guich yesterday to note what was going on in that

a generally better feeling is in evidence everywhere.

Colonel John M. Burke, formerly of Sait Lakke, but now of Spokane, recently purchased the Bana tte mine for something like \$10,000.

The Bonanza mine, with its big mill of over 100 stamps pounding away, also changed hands for \$700,000. There have been several other deals consummated in that locality and other have been several other deals consummated in that locality and other are in the course of nezotiation.

P. J. DALY'S INVESTMENT.

Attorney Takes An Ontion On Nevada Copper Property.

Attorney P. J. Daly returned yester-day from Galconda, Nev., where, on behalf of himself and eastern associbehalf of himself and castern associates, he closed up an option on the Farrel group of five claims, the price to be paid being \$20,000. A fine showing of copper ore is disclosed in the property, the ore carrying 17 per cent in the red metal and some gold. But one claim has been developed to any extent, the workings on this consisting of a fifty-foot incline and a fifty-foot tunnel. It is the intention of the purchasers to open up the property on an extensive scale and demonstrate its value.

DISCUSS TREATY OF PEACE.

Senor Rio Explains Its Terms to

Madrid, July 3.—The Spanish senate resumed today the discussion of the resumed today the discussion of the treaty of peace between the kingdom of Spain and the United States.

Senor Montero Rio, president of the Spanish peace commission at Paris, declared that Spain would enjoy the same commercial rights in Cuba, Porto Rico and the Philippines as would be enjoyed by the United States. He pointed out that the treaty was based upon the principle that Spain had relinquished sovereignity over Cuba in order that the island should become independent, and not be annexed to the United States.
